Cal OES COASTAL REGION

Apartment Complex Fire, Concord, Contra Costa County

On 04/24/18 at 0030 hours, a large fire broke out at a multi-story apartment building in Concord, Contra Costa County.

- The apartment complex was an unoccupied five story structure at the corner of Clayton and Galindo in Downtown Concord.
- The complex was under construction and was approximately 70% complete.
- Destroyed unit is approximately 260,000 square feet with 180 units and an attached parking garage.
- Per the Cal OES Fire Duty Officer (FDO) the fire is currently under control. Crews will be overhauled throughout the morning.
- There are no outstanding mutual aid requests or assistance needed and no unmet needs.
- Cal OES Duty Officers are monitoring the situation and providing updates as warranted.

Evacuations

Per the Cal OES Law Duty Officer (LDO):

- An estimated 250 occupants are currently under evacuation from Renaissance Square, a separate apartment building with 134 units, next-door to the fire.

Evacuation Center

Per the Cal OES Coastal Region Duty Officer (CDO):

- Red Cross has set up an Evacuation Center at a park on Todos Santos Plaza, 2175 Willow Pass Rd., Concord.
- There are approximately 20 persons gathered at the evacuation center.
- First Presbyterian Church at 1965 Colfax St, Concord, a block away, will be serving breakfast for evacuees.
- Evacuees are expected to return within the next couple of hours.
- There is no need for a shelter.

WEATHER SYNOPSIS BY REGION

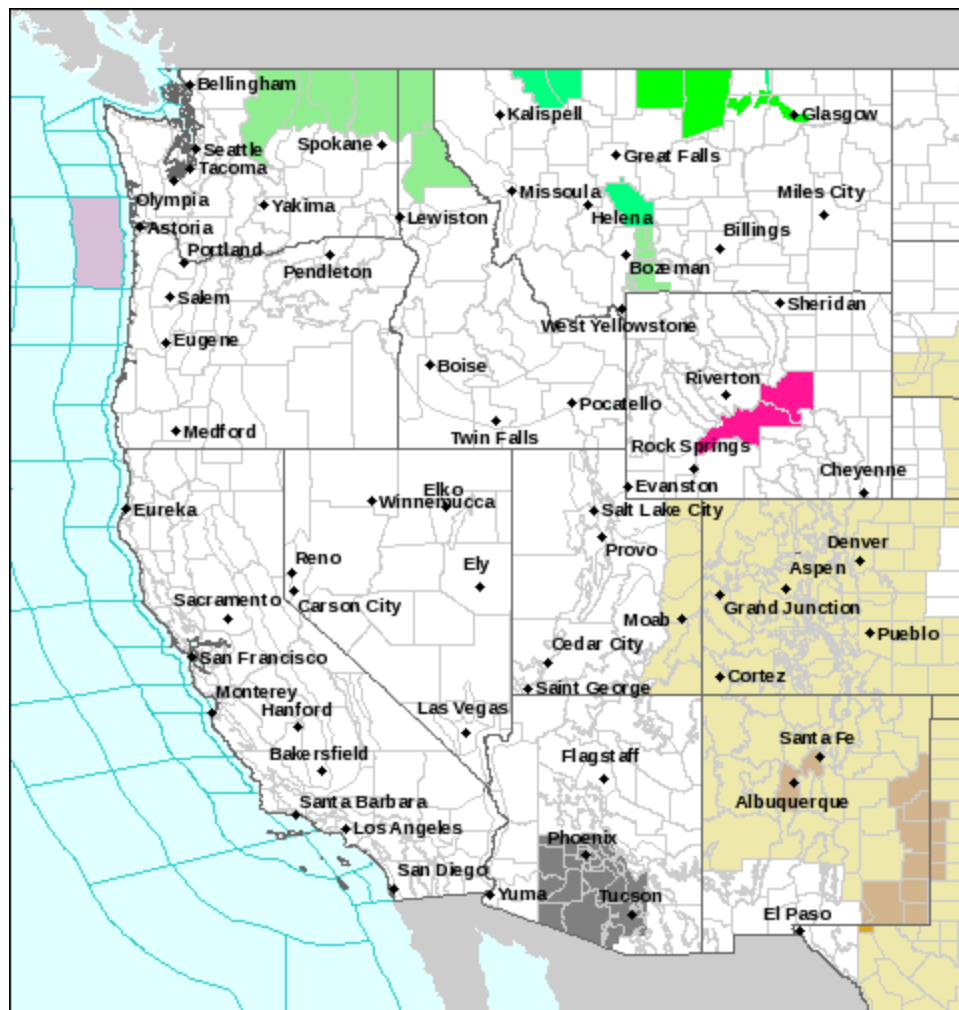

NORTHERN CALIFORNIA

A high pressure ridge which has been directly over the Northern California (CA) region will gradually move east today and Wednesday as a Pacific low pressure system approaches the northern CA coast. Today will be warm and dry, with afternoon temperatures still 10-15 degrees above normal and minimum afternoon humidity in inland areas in the upper teens. Northerly winds are gusting to 20-25 mph and locally higher in wind-prone areas from the western Cascade-Sierra slopes to the coastal range this morning, but they will die off around noon. The offshore low pressure will turn winds to southerly this afternoon and this pattern will bring cooler and more humid conditions into the Northern CA region starting late today. Clouds will also increase mainly over the mountains late today, and isolated showers or thunderstorms are possible over the crest of the Sierra as far north as I-80 this afternoon and evening. The southerly winds will increase slightly on Wednesday, and Wednesday afternoon and evening will be about the same as today. As the low moves closer to the coast and the ridge exits the region on Thursday conditions will become cooler, more humid, and clouds and southerly winds will increase. Shower and thunderstorm chances will start earlier and cover a larger area. This trend will continue Friday through at least Sunday as the low moves overhead.

SOUTHERN CALIFORNIA

There will be very little change in temperature and humidity across the region through Thursday as a ridge of high pressure remains over the West Coast. Maximum temperatures will be 10-15 degrees above normal away from the coast, with upper 60s and 70s across the mountains and 80s to low 90s in the valleys. Minimum humidity will be mainly in the teens away from the coastal areas. Southeast flow aloft may bring isolated afternoon thunderstorms to the Sierra Crest Wednesday and Thursday. A Pacific trough will approach the West Coast Friday and then push inland and remain over the West Coast Saturday through early next week bringing substantial cooling and an increase in humidity. Westerly winds of 20-30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday through early next week.
